PROFILE SUMMARY

Detail-oriented and motivated **Computer Science undergraduate in University of Kelaniya**, specializing in Data Science with **over 2 years** of practical experience in designing, developing, and deploying full-stack web applications. Skilled in **front-end** and **back-end development**, **API integration**, **version control(Git)**, and working with **cloud platforms(AWS)**. Experienced in building scalable and maintainable solutions through successful client projects and team collaboration. Actively participated in and achieved recognition at hackathons and technology competitions, including securing **1st place at Intellihack NextGen 2024**. Passionate about AI integration and data-driven development. Currently seeking a **software engineering internship** to apply and enhance technical and collaborative skills in real-world projects.

PROFESSIONAL EXPERIENCE

Sonulo (PVT) Ltd

2023 - Present

Full Stack Developer (Part Time)

- **SappierLanka Tours** - [Link](#)

Developed and launched 100% responsive **tourism marketing website** for a local travel agency, increased user interaction by integrating **12+ tour packages**, **5+ blog articles**, and **service cards**. Technologies used: **React.js** for dynamic UI components and **Tailwind CSS** for responsive, utility-first design—ensuring fast load times and mobile optimization.

PROJECTS

ViewMO (Research Platform) - [Link](#)

- Led the development of the Viewmo, an AI-powered platform that won the IntelliHack 4.0 hackathon.
- Integrated 4 advanced tools (Chat with Document, MCQ-Bot, Research Pal, AI Visualizer) and deployed scalable infrastructure on GCP using Cloud PostgreSQL.

Mental Health Chat Bot - [Link](#)

- Developed 2 features such as AI chatbot and with real-time therapist recommendations, powered by LLM.
- Technologies: Next.js frontend, FastAPI backend, Vector DB for semantic search, and custom-trained language models using 100+ resource documents.

Quiz Cast (Quiz Competition Platform) - [Link](#)

- Designed a full-stack quiz platform with 100% real-time interaction, Next.js for SSR, Tailwind CSS and Flowbite for UI design, hosted on Vercel. FastAPI for the APIs, Supabase for real-time data sync and auth, deployed on Azure.
- Implemented 4+ key features such as live leaderboards, real-time quiz hosting, and participant analytics, enhancing user engagement during competitive events.

E-Commerce Platform (Shoppers) - [Link](#)

- Engineered a scalable e-commerce platform with firebase authentication, purchase items through the cart, including 15+ products handling online transactions using Stripe payment gateway.
- Tools Used: TypeScript for scalable codebase, Sanity as headless Content Management System(CMS), Tailwind CSS for design, Firebase for auth and cloud backend.

Parking Management System - [Link](#)

- Engineered CRUD-based functionality for real-time parking slot managements, handling 60+ parking units.
- Built using Guna UI for custom Windows forms, C# and .NET for backend logic, and MySQL for relational data storage.
